You have a choice...

*The hospital you trust ...
the **convenience** you need.*

WELCOME TO SOUTHSIDE IMAGING CENTER.

When your physician orders an imaging test, you have a choice of where to go. Now you can choose high quality and convenience ... from the hospital you trust. Southside Imaging Center serves the fast-growing southside neighborhoods with board-certified radiologists and some of the most sophisticated imaging technology available.

Services:

- High-field open MRI (magnetic resonance imaging)
- Multi-slice CT (computed tomography)
- Ultrasound
- Digital mammograms
- Diagnostic radiology services

EQUIPPED WITH EXCITING NEW TECHNOLOGY

Convenience. Comfort. Faster Results.

At Southside Imaging Center, you'll find some of the latest imaging technologies available. That means shorter exam times, maximum comfort and faster, more accurate results than are possible with less sophisticated technology.

Philips Panorama High-Field Open 1.0T MR Scanner

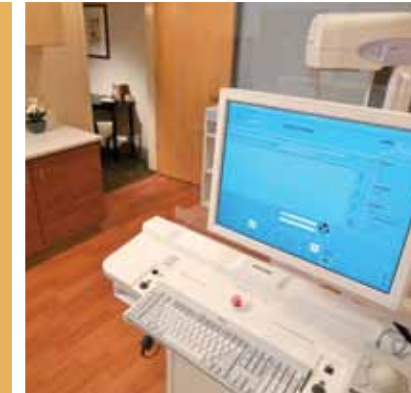

This scanner includes an open design to help put patients at ease – including larger patients and those who suffer claustrophobia.

It uses a powerful magnet in conjunction with radio frequency waves to generate images of your internal organs and structures. Doctors can see images in great detail from many angles.

Siemens Acuson S2000 Ultrasound

This advanced ultrasound technology dramatically enhances image quality, producing the most photo-realistic ultrasound images available. Versatility and imaging capabilities help create a more comfortable and time-efficient exam.

Hours of Operation

Monday through Friday
8:30 a.m. to 5:00 p.m.

To schedule an appointment,
call: **803-641-5808**

All-Digital Mammography Services

Southside women now have access to all-digital mammography services, close to home. All-digital mammography can help us detect breast cancer in earlier stages, when it's more treatable.

And you'll receive care from the same staff you've come to know and trust at Aiken Regional's Women's LifeCare Diagnostic Services.

Toshiba Aquilion 16-slice CT

Enhanced for greater comfort and safety, this machine provides faster exams and improved image quality, allowing quicker diagnosis and less need for repeat procedures. It can rotate around your entire body in 400 milliseconds, reducing image distortion of moving organs.

This technology produces the highest image quality available while significantly reducing radiation and contrast dose. It allows doctors to quickly determine the extent of diseases.

MEET THE BOARD-CERTIFIED RADIOLOGISTS* WHO WILL BE READING YOUR RESULTS

Alfonso Gay, MD

Board Certification:
Diagnostic Radiology
Specialty: CT/MR/US Imaging

Ronald P. Robinson, MD

Board Certification:
Diagnostic Radiology
Specialty: Interventional Radiology

Robert F. Searles, DO
